FREQUENTLY ASKED QUESTIONS

What is IPL (Intense pulsed light)?

IPL is a cosmetic treatment that uses gentle pulses of intense, optimised light to treat undesirable pigment and vessels which can occur as a result of ageing and lifestyle choices. IPL treatments can improve: sun spots, age spots, rosacea, spider veins and much more!

What types of results can I expect?

You can expect to see a decrease in the appearance of skin pigment and vessels for a more even skin tone.

How does it work?

IPL rejuvenation treatments use an optimised light device to deliver energy into your skin, targeting vascular and pigmented lesions, which slowly disappear as your body's natural healing process progresses.

How long does it take?

An IPL procedure can be performed in as little as 30 minutes, depending on the size of the treatment area.

Does it hurt?

Most people feel little to no discomfort during the procedure.

What areas can be treated?

With the Icon you can customise treatments for your face, chest, arms, hands and legs.

How many treatments will I need?

You can see some improvement immediately. Only one or two treatments may be needed, depending on the severity of your conditions. Several treatments may be necessary to achieve your best results.

How quickly will I recover?

You can resume regular daily activities right away and start to see improvement immediately.

What can I expect following the treatment?

Typically, most people experience a mild, sunburn-like sensation, possibly accompanied by some minor swelling immediately following the treatment. This usually lasts two to 24 hours. Ask your provider to discuss other possible side effects and the necessary post-treatment care with you.

- ⦿ No downtime
- ⦿ Comfortable treatment
- ⦿ Fast, easy treatment sessions
